Art Unit: 2856

1. Applicant has not complied with one or more conditions for receiving the benefit of an earlier filing date under 35 U.S.C. 120 as follows:

An application in which the benefits of an earlier application are desired must contain a specific reference to the prior application(s) in the first sentence(s) of the specification or in an application data sheet by identifying the prior application by application number (37 CFR 1.78(a)(2) and (a)(5)). If the prior application is a non-provisional application, the specific reference must also include the relationship (i.e., continuation, divisional, or continuation-in-part) between the applications except when the reference is to a prior application of a CPA assigned the same application number.

On page 1, line 4 for the required specificity " 15 September 1999 " should be replaced with - - - 12 May 1999 - - -.

2. Applicant is also requested to on page 1, line 3 after "2002, " to insert - - - and now U.S. patent no. 6,697,152, - - -.

3. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-18, drawn to a probe for computing a relative surface energy of a test surface, classified in class 73, subclass 104.
- II. Claims 19-32, drawn to a method for measuring the relative surface energy of a test surface, classified in class 73, subclass 104.

4. The inventions are distinct, each from the other because:

Inventions Group 2 and Group 1 are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the process as claimed can be practiced by another and materially different apparatus such as one not requiring the use of a force sensor affixed to the manipulator as required in Group 1 such as one where the force is determined by measurements using a non contact sensor, etc.

5. Because these inventions are distinct for the reasons given above and the search required for Group 1 is not required for Group 2, and vice-versa, restriction for examination purposes as indicated is proper.

Art Unit: 2856

6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
